

# OUR SOLUTIONS

**KEPRO has provided care management services to public program and commercial clients since 1985.**

## KEPRO

We are a national care management and quality improvement organization, providing innovative and outcomes-focused solutions to reduce unnecessary healthcare utilization and optimize care quality for public and commercial clients. Our holistic, member-centric care management solutions go far beyond traditional utilization and case management by coordinating the care provided to members with acute, chronic, and complex conditions across the continuum.

We also identify members who are at the highest risk for future services, but have not yet had an acute event. Tailored programs maximize members' quality of life and realize greater cost savings for members and clients.

KEPRO is accredited in health utilization management, case management, and disease management. We are also National Institute of Standards and Technology (NIST) and Federal Information Security Management Act (FISMA) certified.

## OUR SERVICES

An integrated approach to care management delivers the highest return on investment, but we also offer our services on an individual basis.

- Wellness
- Utilization Management
- Case Management
- Speciality Case Management - oncology management, advanced illness management, heart failure management, and maternity management
- Care Coordination
- Chronic care management
- Independent Medical Review and Appeals
- Quality Oversight/Risk Management.

## OUR PROPRIETARY MEDICAL MANAGEMENT SYSTEM

Our proprietary, integrated care management solution transforms traditional, episodic-based care management into proactive and collaborative population healthcare management. Atrezzo™ allows us to collect data at every care touchpoint, ensuring members get the care they need, when and where they need it.

Atrezzo's web-based care management application is built using Microsoft technology. Its modular design is easily configurable to meet each client's unique short and long term requirements for data, information, and intelligence today and in the future. Atrezzo is HIPAA and ICD-10CM/PCS compliant.

## INTELLIGENT VALUE

We are flexible, agile, and innovative. We are on a journey to transform medical management and develop customized solutions tailored to your specific business requirements.

Improving patient outcomes, reducing costs, and achieving return on investment are our priorities. We focus on results and back our work with tangible performance commitments.

Deep clinical expertise is at the core of our organization. Our approach to medical management is holistic and compassionate. It is streamlined and coordinated around the patient's entire health care experience. We are proactive to reduce risk. We focus on efficiency and value.

Data informs our clinical competency. We leverage technology to empower our medical management teams with the analytics to make smart clinical decisions, collaborate with patients, provide personalized care, and improve quality and outcomes. Our systems are scalable, simple-to-use, and seamlessly integrate into complex delivery models.

Great customer service is central to everything we do. We respond with a sense of urgency. We solve problems proactively.

Every day our work is founded in intelligence – clinical expertise and data-driven insights – to achieve value for you and your members.

Intelligent value.

This is KEPRO.
